

## Lesson 2: What Behaviors Help Animals Survive?

1. Once again, name three things that animals need to survive.

-----  
-----

2. Name two kinds of animals that live in groups. Explain how living in groups is an adaptation that helps these animals survive.

-----  
-----  
-----  
-----  
-----

3. Name three of the animals mentioned in the book that care for their young.

-----  
-----  
-----

4. What is **migration**? Why do animals migrate?

-----  
-----  
-----  
-----

5. Name at least **three** animals listed in your science book that migrate.

---

---

---

6. What is **hibernation**?

---

---

---

7. What are the two kinds of hibernation and how are they different from each other? Name an animal that is an example of each type of hibernation.

---

---

---

---

---

---

8. Name and describe at least one symbiotic relationship written about in your book.

---

---

---

---
