Unit 1

Place Value and Multidigit Addition and Subtraction

What Is Assessed?

- Identify place value to one million.
- Add with greater numbers.
- Subtract with greater numbers.

Explaining the Assessment

Mathematical Practices CC.K–12.MP.1 CC.K–12.MP.2 CC.K–12.MP.7 CC.K–12.MP.8

- **1.** The assessment will require students to apply content learned in the unit involving place value and using the operations of addition and subtraction with greater numbers.
- **2.** Ask students to list some of the websites they visit, such as social network sites, educational or gaming websites, or blogs.
- 3. Read the task aloud to the class.
- **4.** Discuss the concept of "unique users." Ask students to explain why website traffic is determined by number of unique users instead of numbers of individual hits.

Possible Responses

- 1. 3,336 more unique users
- 2. 37,967 more unique users
- 3. Possible pattern: Each row is ten times as great as the previous row.
- **4.** May
- **5.** No; answers should indicate students' understanding that it becomes more difficult to increase viewership by ten times as the number of unique users increases. Students may also recognize the number of total unique users as a finite number or describe the feature on March 3 as a unique event.
